INVESTOR DECK • 2026

T1.

The Digital Discipline Engine

ARE YOU IN THE TOP 1%?

— THE PROBLEM

Attention is the most exploited asset on earth.

Every app on your phone is engineered to steal your focus. The average person loses 4+ hours daily to algorithmically-designed distraction loops — and no tool tells them the truth about their digital behavior.

$455B
Attention Economy Market

— WHY NOW

The market is broken. Users know it.

Screen Time Tools Are Useless

Apple & Google screen time reports show raw numbers with zero behavioral intelligence. Users see data but gain no insight.

Existing Apps Shame, Not Build

Forest, Opal, and One Sec use guilt-based mechanics — blockers that get disabled in 48 hours. They fight symptoms, not patterns.

Gen Z Demands Proof, Not Promises

18-25 year olds won't trust vague advice. They want verifiable, data-driven scores that prove their discipline against real peers.

No Monetized Discipline Economy

There's no token system that rewards real-world focus. Duolingo gamified learning. T1 gamifies discipline itself.

— THE SOLUTION

T1 doesn't block your phone. It scores your discipline.

A behavior-intelligence engine that measures real digital patterns, computes a verifiable Focus Score, and lets users compete, earn, and prove their discipline on a global leaderboard.

- 🎯 Focus Score Engine
- 🏆 Global Leaderboards
- 🪙 Proof-of-Focus Tokens
- 🤖 AI Coach
- ⏱️ Focus Sessions
- 🏅 Performance Badges

— CORE IP

The Focus Score Engine v5

A proprietary scoring algorithm that computes a 0-99 Focus Score from real-time behavioral telemetry — not self-reports or manual logs.

- **7-Day Relative Behavioral Baseline**
  You compete against your own past — not arbitrary industry benchmarks
- **Dual-Purpose App Classification**
  Users decide if YouTube is Education or Entertainment for them
- **Diminishing Returns & Streak Multipliers**
  4 calibrated score bands with anti-gaming protections
- **Confidence Calibration (0-100%)**
  Score reliability increases from 0% to 100% over 7 days of verified data

— DUAL ENGINE ARCHITECTURE

Two scores. One truth.

T1 runs two independent scoring engines to give users a complete picture of their digital discipline.

87

Focus Score

Measures progress toward your chosen goal category using a 7-day rolling baseline.

Goal-Relative | Category Time | Session Bonus

72

Behaviour Score

Measures overall digital hygiene — screen time, unlock frequency, app diversity, and focus session completion.

Screen Time | Unlocks | App Opens | Anti-Cheat

— PRODUCT

Built features. Not mockups.

Every feature below is implemented, tested, and production-ready in the Android app.

🎯

Real-Time Focus Dashboard

Live Focus Score, Behaviour Score, confidence %, screen time, unlock count, app opens, and category time distribution — all updating in real-time.

⏱️

Deep Focus Sessions

25/45/60-minute Pomodoro-style deep work timers with haptic feedback, token rewards on completion, and focus session streak tracking.

🤖

AI Coach (On-Device)

A privacy-first AI coach that analyzes your stats locally and gives personalized behavioral advice. No cloud API calls. Zero data leaves your phone.

🏆

Global Leaderboard

Ranked competitive leaderboard powered by verified Focus Scores. Daily snapshots, percentile badges, and transparent ranking methodology.

T1 Token Wallet

Earn tokens through focus sessions and streaks. Full wallet with transaction history, balance tracking, and Supabase-synced persistence.

Performance Badge System

Dynamic percentile-based badges: Top 1%, Top 5%, Top 10%, Top 25%. Badges change based on real daily performance — no permanent trophies.

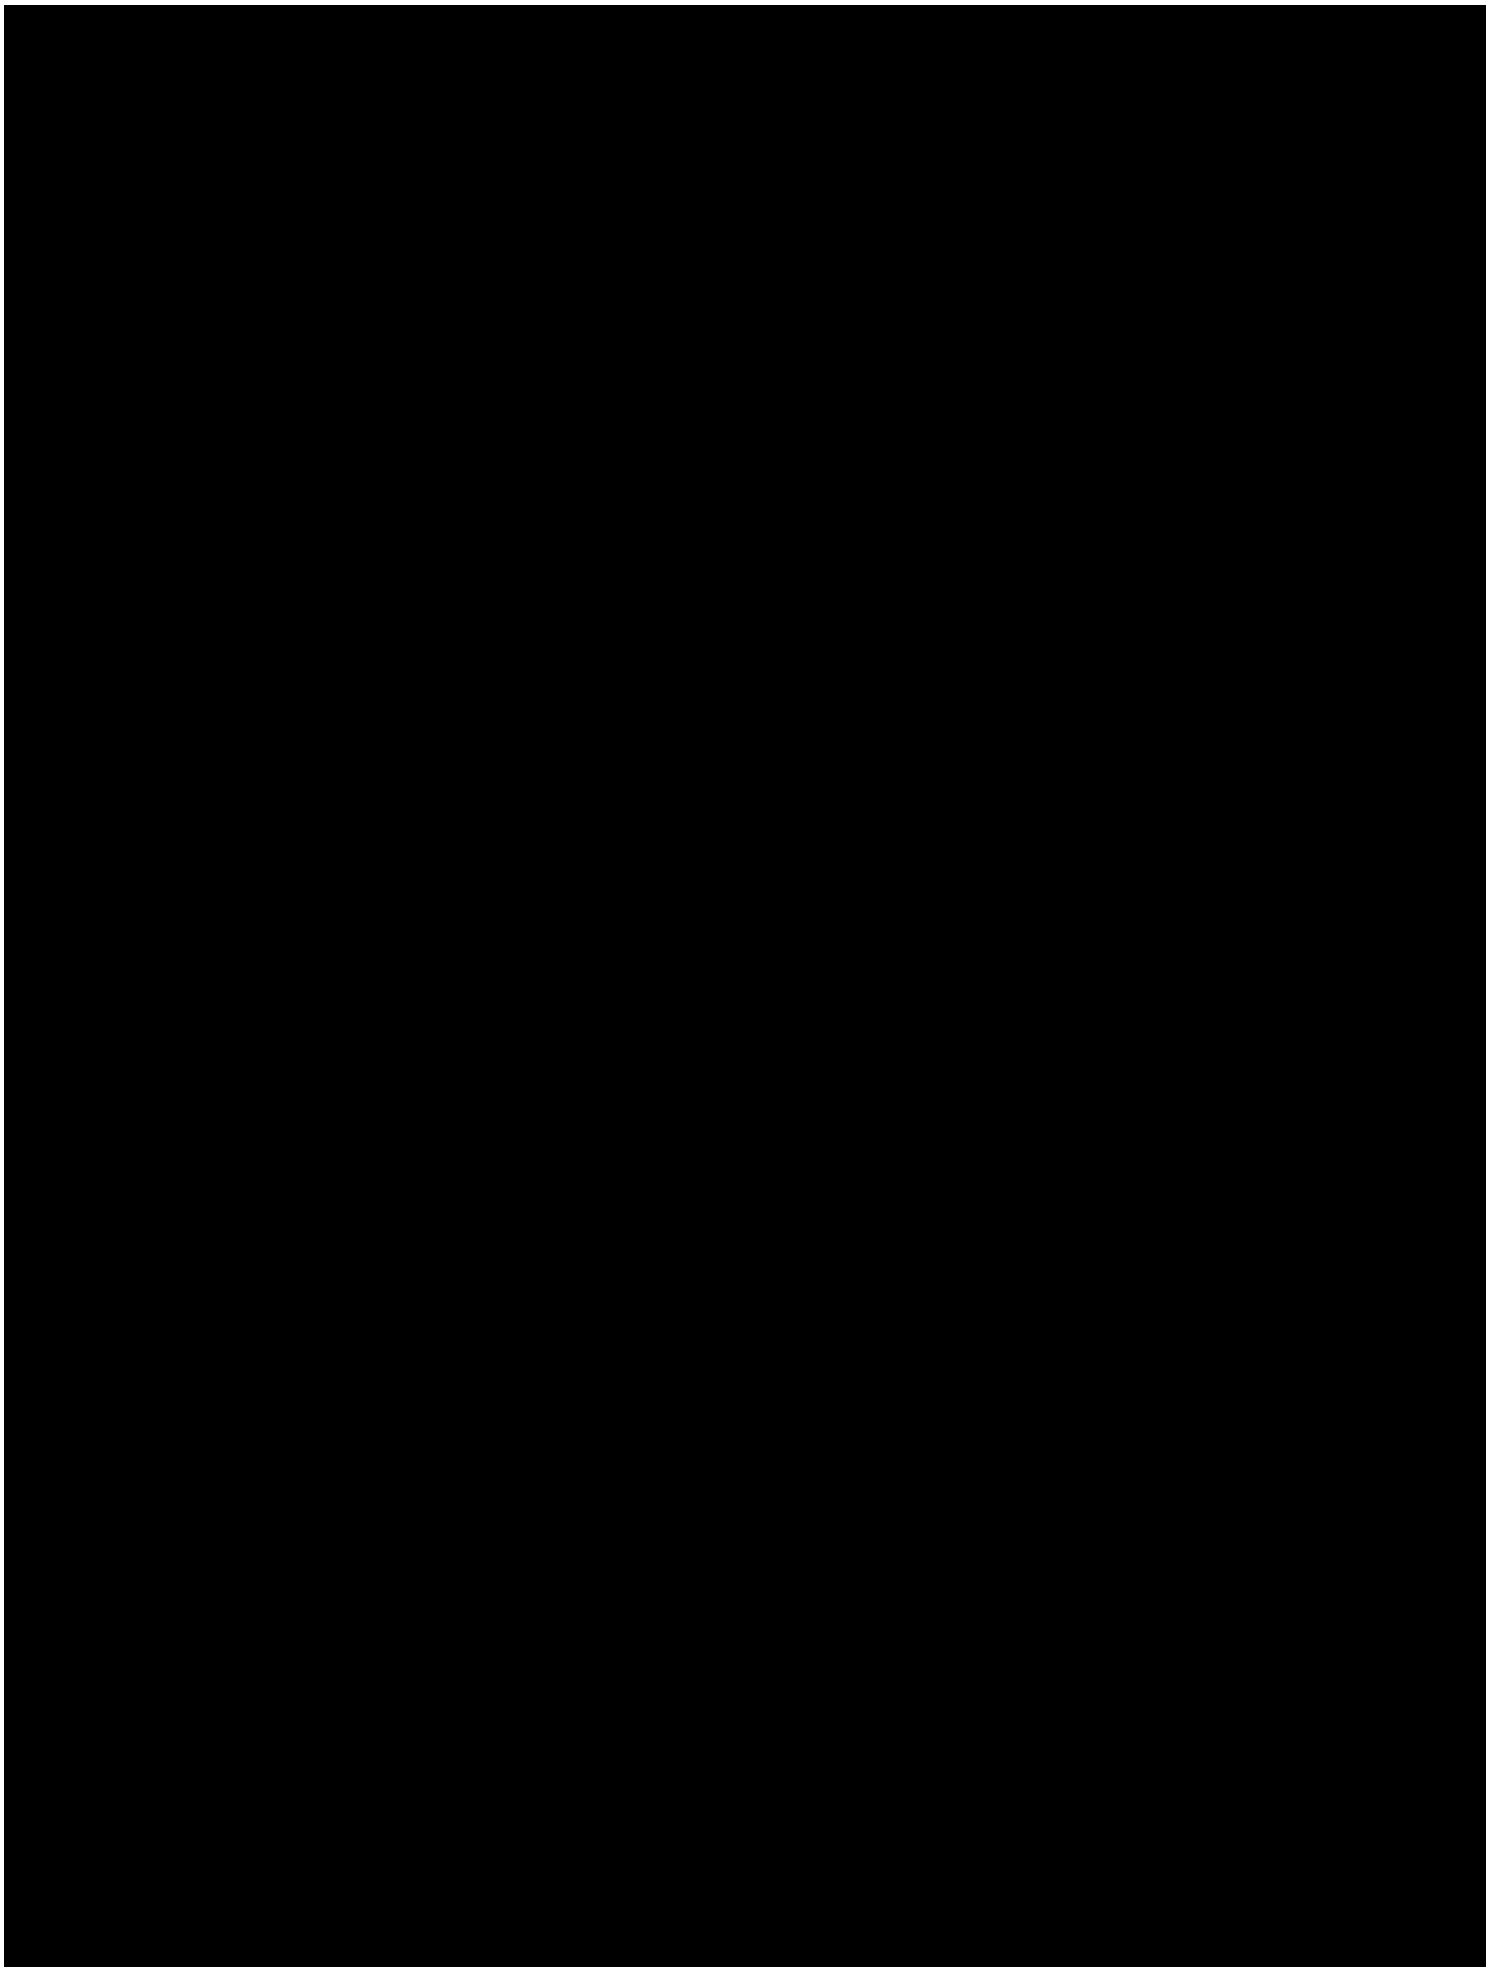

Category Intelligence

200+ pre-classified apps across Productivity, Education, Social, Entertainment, Communication. User-configurable dual-purpose app overrides.

Smart Notifications

Context-aware behavioral nudges — morning insight summaries, screen time alerts, focus session reminders, and milestone celebrations.

— USER JOURNEY

Zero to scored in 3 minutes.

A frictionless 6-step onboarding flow that gets users to their first Focus Score immediately.

— TOKEN ECONOMY

Proof-of-Focus. Not Proof-of-Purchase.

T1 Tokens cannot be bought. They are mined through verified deep work. This creates a discipline-backed digital currency with intrinsic behavioral value.

⛏️

EARN — Focus Mining

Complete a 25-min focus session = earn T1 tokens. Tokens are minted locally and synced to Supabase with anti-cheat verification. You cannot buy focus.

⚔️

STAKE — Wager Leagues

Stake tokens on competitive focus challenges. Winner takes the pool. High-stakes accountability that makes screen time reduction feel like a sport.

🛍️

SPEND — Merch & Premium

Redeem tokens for exclusive T1 merchandise (tees, hoodies), premium app themes, custom focus ring skins, and profile customizations.

TRADE — P2P Marketplace

Future peer-to-peer token marketplace where users can trade earned tokens. Creates a secondary economy around verified productivity.

— COMPETITIVE LANDSCAPE

Different category.

T1 doesn't compete with app blockers. It creates a new category: Behavioral Intelligence + Incentivized Discipline.

REVENUE MODEL

Three revenue streams. Zero ads. Zero data sales.

PRIMARY

T1 Premium

Subscription tier unlocking advanced analytics, custom focus ring themes, extended AI coach capabilities, and exclusive leaderboard categories.

₹149/mo

SECONDARY

T1 Merch Store

Exclusive physical merchandise (T-shirts, hoodies, accessories) purchasable only with T1 Tokens. Creates scarcity and demand for the token economy.

Token-gated access

TERTIARY

Wager League Rake

T1 takes a small platform fee on competitive wager pools. Users stake tokens, compete on focus, winner takes the pot minus rake.

5-10% platform fee

— ARCHITECTURE

Production-grade stack.

Built with the same tech that powers unicorn startups. Local-first, privacy-preserving, cloud-synced.

— PRIVACY & TRUST

Your data stays on your device.

T1 is built on a radical privacy-first principle: all behavioral analysis happens locally. We never sell data. We never show ads. We never monetize attention.

On-Device Processing

Focus Score and Behaviour Score are computed entirely on your phone. Raw usage data never leaves your device.

Zero Ads. Forever.

T1 will never show advertisements. Revenue comes from premium subscriptions and token-gated commerce — not your attention.

Full Account Deletion

One-tap permanent deletion of all cloud data. Compliant with Google Play's 2023 account deletion mandate.

📜

Production-Ready Legal

Privacy Policy and Terms of Service finalized and verified. GDPR-aligned data handling. Encryption at rest (AES-256) and in transit (TLS 1.3).

— ROADMAP

From launch to economy.

PHASE 1 — NOW

Google Play Launch

Ship production AAB. Focus Score + Behaviour Score + Leaderboard + Token Wallet + AI Coach. Core product complete.

PHASE 2 — Q4 2026

Wager Leagues & Premium

Launch competitive staking pools. T1 Premium subscription. College & Friends leaderboard tiers. Enhanced AI coaching with behavioral patterns.

PHASE 3 — Q1 2027

T1 Merch Store

Token-gated physical merchandise. Exclusive T1 apparel only purchasable through earned focus tokens. Creates token demand and scarcity.

PHASE 4 — Q2 2027

P2P Token Marketplace

Open peer-to-peer token trading. Secondary economy emerges. Enterprise API for employers/universities to verify digital discipline.

PHASE 5 — Q4 2027

iOS + Cross-Platform

iOS app launch. Cross-platform leaderboard unification. International expansion. API partnerships with productivity tools.

Every app steals your attention.

T1 scores it.
