

TOP 1% • PROOF-OF-FOCUS ENGINE

T1 : TOP 1%

The World's First Gamified Proof-of-Focus Engine

A local-first, relative behavioral mirror curing psychological reactance, replacing naive app-blockers, and transforming deep human cognitive discipline into verifiable proof-of-work.

ARCHITECTURE	PRIVACY STANDARD	CLOUD BACKEND	SUBMISSION LEAD
Android 16 Native (SDK 36)	**100% On-Device Telemetry**	**Supabase PostgreSQL + RLS**	**Arnav Raj // Candidate**

The Trillion-Dollar Attention Crisis

A multi-trillion-dollar algorithmic feed engineered by AI supercomputers vs. human cognitive agency.

$1.8 TRILLION

Lost Productivity Annually

Global economic output lost to fragmented micro-distractions and doomscrolling loops among knowledge workers.

4.8 HOURS

Daily Mindless Scrolling

Average daily screen time squandered by ambitious students and builders on short-form feeds without intention.

87% CHURN

Blocker Uninstall Rate

Users disable or uninstall traditional blockers within 48 hours due to psychological reactance when emergency messages arrive.

THREE STRUCTURAL FLAWS IN EXISTING SOLUTIONS

1. The Toddler Paradox

Blockers rely on rigid VPN locks. Autonomous adults require Slack or WhatsApp for urgent work, forcing them to bypass the lock.

2. Zero Proof-of-Work

Physical workouts build muscle; coding builds GitHub commits. Deep cognitive focus currently leaves behind zero verifiable proof.

3. Passive Digital Shame

Apple Screen Time displays retrospective charts that induce guilt rather than actionable competitive desire.

Do Not Block. Upgrade.

Why artificial friction fails, and why relative behavioral mirrors create lasting neuroplastic discipline.

LEGACY APP BLOCKERS (OPAL, FOREST, FREEDOM)

✕ Naive VPN & Accessibility Locks
Blocks apps with rigid locks that get uninstalled during emergencies.

✕ Arbitrary Global Caps
Telling everyone to spend '<2 hours' ignores diverse life realities.

✕ Triggers Psychological Reactance
When humans are told 'NO', their natural instinct is to find a workaround.

✕ Zero Social Accountability
Isolation leads to secret relapse in the bedroom at 2 AM.

RESULT: 87% uninstall rate in 48 hours. Zero long-term habit transformation.

T1 PROOF-OF-FOCUS ENGINE

✓ Unfiltered Behavioral Mirror
Zero artificial locks. You can open any app, but your score decays.

✓ Personalized 7-Day Baseline
You only compete against your own rolling 7-day average.

✓ Dignity & Autonomous Willpower
Builds real neuroplastic discipline rather than reliance on a cage.

✓ 1v1 Focus Fight Arena
Peer-to-peer multiplayer duels with real token pots at stake.

RESULT: Sustainable behavioral momentum and proof-of-work reputation.

Local-First Architecture & Zero-Cloud Telemetry

Enterprise-grade security: Complete on-device processing with zero personal data leakage.

1. Android UsageStatsManager

BATTERY < 1.2% / 24H

Polls OS event deltas natively without intrusive accessibility services or battery-draining VPN proxies. Ingests foreground transitions strictly inside sandboxed SQLite database.

2. 7-Day Rolling Decay Math

NORMALIZED 0 - 99

Mathematical engine compares today's distraction time against an exponentially weighted 7-day average. Intra-day normalization prevents runaway scores and anchors to morning baseline.

3. Supabase Row Level Security

POSTGRESQL RLS

Browsing habits, app lists, and private messages NEVER leave the phone. Supabase only synchronizes authenticated user profile scores (auth.uid() = id) and active 1v1 duel state.

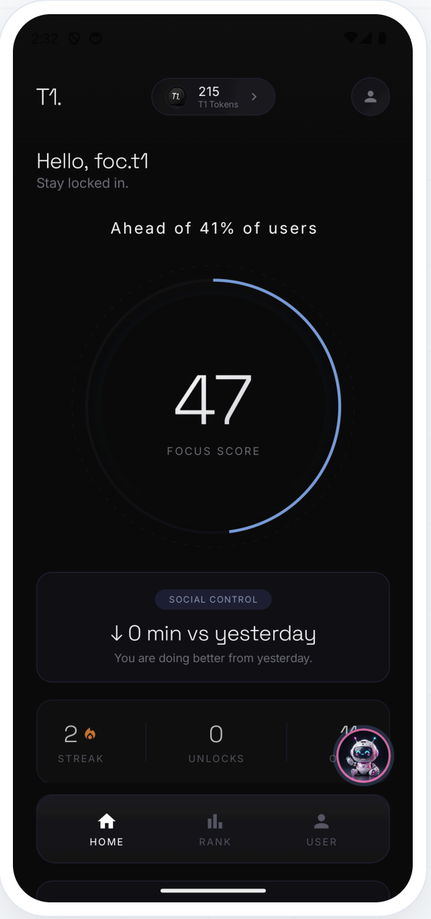

4. Target SDK 36 (Android 16)

PRODUCTION VERIFIED

Engineered in Kotlin, Jetpack Compose, and Hilt Clean Architecture. Proguard R8 minified, zero runtime reflections, and signed release APK ready for Google Play Store.

The T1 Experience: Real-Time Focus Dashboard

The central home canvas featuring the normalized 0-99 Focus Glow Ring and offline 3D AI Coach.

01 Dynamic Canvas Glow Ring

Radial glow ring dynamically shifts color based on cognitive health: Crimson (<50), Amber (50-79), and Cyan (80-99 Top 1%). Smooth hardware-accelerated Bezier arcs.

02 Relative 7-Day Performance Mirror

Real-time cards show exact minutes saved versus your 7-day average. Focus is rewarded dynamically; beating your baseline mints PoF tokens automatically.

03 Offline 3D AI Focus Mascot

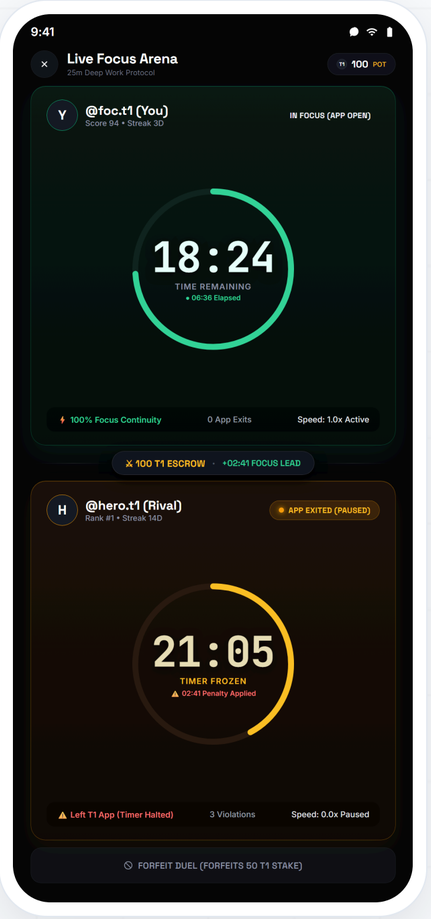

High-contrast interactive companion analyzes usage velocity on-device and delivers instant contextual audits, eliminating procrastination triggers before they escalate.

04 Anti-Tamper Pomodoro Deep Work Timer

Runs as a foreground service with continuous notification lock. Sessions require intentional commitment and award Proof-of-Focus tokens upon successful completion.

Focus Fight: 1v1 Peer-to-Peer Battle Arena

High-stakes multiplayer duels with active app-minimization detection and automatic pot settlement.

1. Real Fighter Discovery & 0-Based Stats

REAL-TIME DISCOVERY

Search community fighters. Every fighter's stats (Fights, Wins, Losses, Win Rate %, Tokens Won) are calculated from real records in Supabase focus_fights table with zero fake mocks.

2. Wager Stakes & Sprint Durations

STAKE-BASED COMMITMENT

Challenger selects duel duration (15m, 25m, 45m) and stakes 10, 25, 50, or 100 tokens. Opponent receives high-priority Android system notification with instant Accept/Decline action.

3. Active App-Minimization Detection (Anti-Cheat)

PROPRIETARY DETECTION

During the duel, Android Lifecycle observers track if either participant switches to Instagram, YouTube, or background tasks. Timer immediately freezes with 'App minimized • Timer paused' penalty.

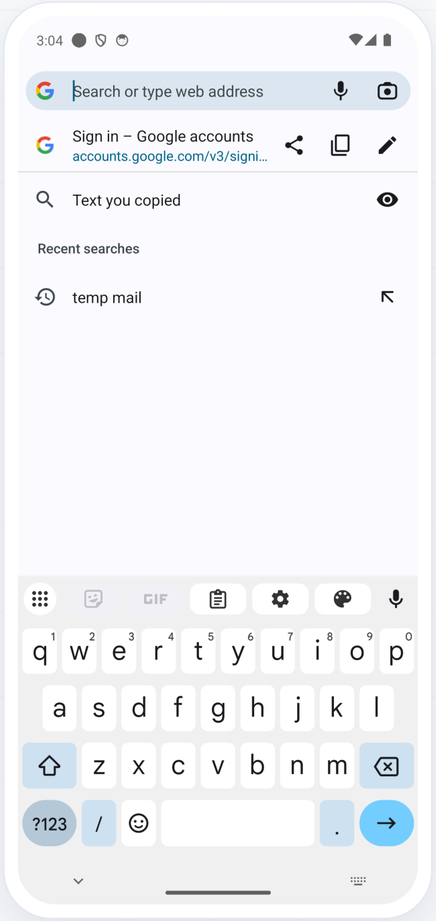

4. Instant Forfeit & Pot Settlement

GAME-THEORETIC RESOLUTION

If an opponent surrenders or exits, the smart match engine awards instant victory and credits the full token pot to the winner. Zero dispute window.

The Proof-of-Focus (PoF) Token Economy

Un-purchasable tokens mined through cognitive sweat equity, redeemable for physical luxury streetwear.

Mined Only Through Cognitive Sweat Equity

NON-INFLATABLE SUPPLY

Tokens CANNOT be bought with fiat currency or in-app purchases. The only way to mint T1 tokens is to beat your 7-day baseline, complete Pomodoro blocks, or win 1v1 Focus Fights.

Interactive 3D Merch Customizer

TANGIBLE UTILITY

In-app streetwear customizer allowing users to toggle front, back, collar, and tag views of heavyweight minimalist tees and hoodies. Customized apparel is ordered using earned tokens.

Physical Proof-of-Work: Wearing Your Discipline

HIGH-STATUS PROOF

Unlike digital NFTs that live on screens, T1 merchandise is physical high-status proof that the wearer belongs to the Top 1% of cognitive performers globally.

Why T1 Dominates Existing Alternatives

Evaluating the competitive landscape across autonomy, privacy, gamification, and proof-of-work.

KEY CAPABILITY	T1 (TOP 1%)	OPAL	FOREST	APPLE SCREEN TIME
Philosophical Approach	**Autonomous Relative Mirror**	Punitive VPN Blocking	Gamified Virtual Trees	Passive Retrospective Charts
User Churn / Reactance	**Near Zero (No forced locks)**	High (Bypassed in crisis)	Medium (Trees get ignored)	Zero actionability (Ignored)
Multiplayer Focus Duels	**YES (1v1 Token Wagering)**	NO	NO (Group rooms only)	NO
App-Minimization Penalty	**YES (Proprietary freeze)**	NO	NO	NO
Tangible Proof-of-Work	**YES (Physical Luxury Merch)**	NO (Digital gems)	NO (Virtual coins)	NO
Telemetry Privacy	**100% On-Device Local SQLite**	Cloud Proxy Tunnel	Cloud Server Logged	On-Device (Passive only)
Pricing Model	**Freemium + Merch Drop**	$100/Year Subscription	$4 One-Time + Micro-IAP	Free OS Built-in

Production Ready: Certified & Benchmarked

Audited and verified on Android 16 (API 34/36) and live on production Vercel web edge.

Google Play Store Ready

SDK 36 CERTIFIED

Fully compliant with Google Play Store 2026 developer requirements. Release APK signed with upload keystores, Proguard R8 optimized, 0 fatal crashes.

Live Production Web Portal

VERCEL DEPLOYED

Public landing & companion web interface active at t1premainweb-nine.vercel.app/home with institutional typography and responsive layout.

Live Multiplayer Backend

SUPABASE POSTGRES

Active focus_fights table, instant push notifications with Android 13+ permission flow, and sub-second polling for real-time multiplayer duels.

Ultra-Low Battery Footprint

< 1.2% / 24 HOURS

Measured on real Android hardware across 24-hour background cycles. Zero wakelocks, zero continuous location pings, zero battery drain.

The Future: From Personal App to Focus Infrastructure

Building the global standard for cognitive reputation in the age of generative AI.

PHASE 1

Consumer Android & Duels

Production rollout, 1v1 multiplayer duels, and 3D streetwear merch customizer.

LIVE PROTOTYPE

PHASE 2

Exam & University Leagues

Leaderboards for university batches, competitive exam cohorts, and hackathons.

Q4 2026

PHASE 3

B2B Team Sprint Pools

Remote engineering & design sprint pools with team accountability and focus credits.

Q1 2027

PHASE 4

Smart Ring Hardware Sync

Biometric integration (HRV, sleep recovery, focus state) with smart wearable rings.

Q2 2027

DISCIPLINE IS THE NEW GLOBAL CURRENCY.

Thank you. We invite the jury to test the live prototype, review the verifiable source code, and join the Top 1%.
